Mantis Shrimp: Gregory Piper / IYOR

Jenny Edmondson

Director - Wavelength Reef Cruises

**What is your favourite part about working at the reef?**

The amazing diversity of life and that it looks so different in different conditions.

**In your opinion, what is the state of the reef?**

The reef is recovering - currently we have had a phase of good growth - there are a lot of juvenile corals which are thriving.

**What can people do to help preserve and protect the reef?**

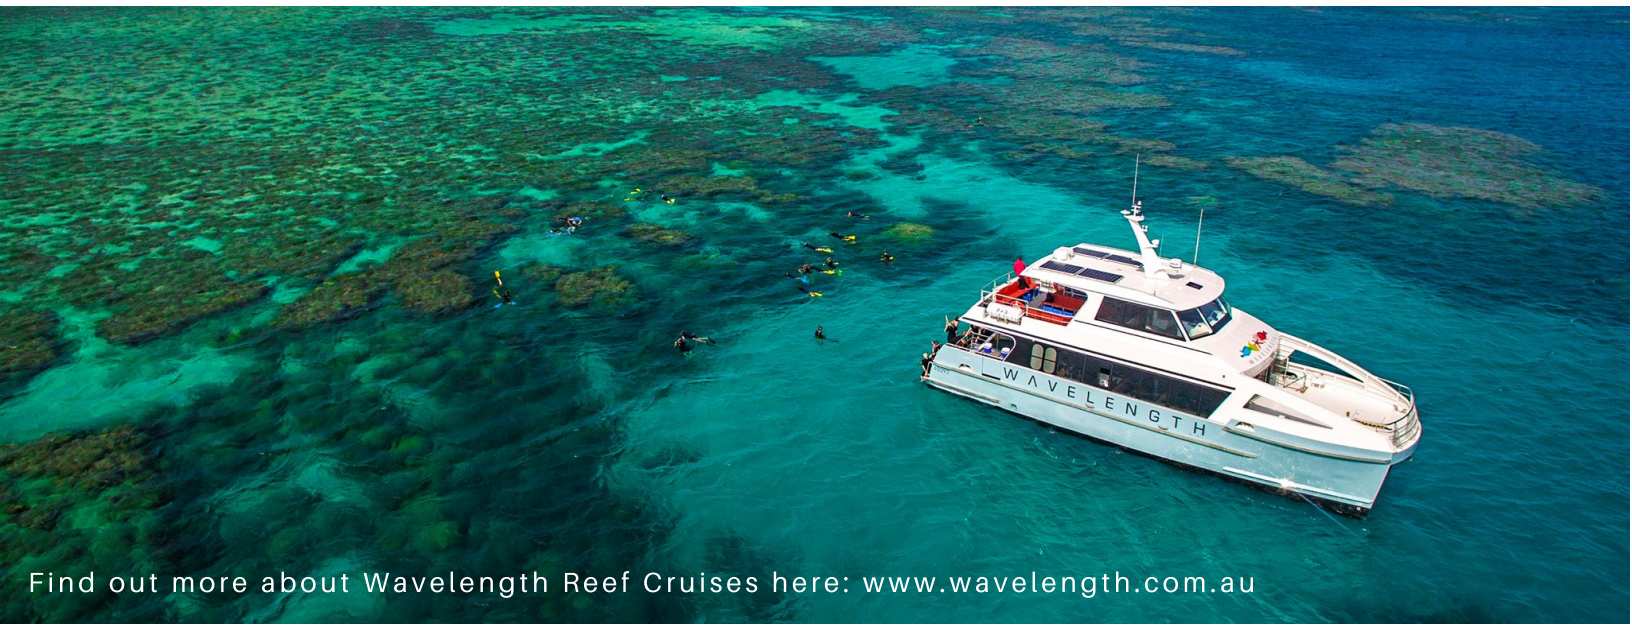

Reduce their carbon footprint and use less plastic.

**What is your favourite reef critter?**

The mantis shrimp!

**What does a day working at the reef look like for you?**

Recently we have been working on a coral restoration program. We have a permit to harvest coral and we have been setting up nurseries and outplanting.
